

Begin Brewing Suggested Kit

This is a custom starter kit built at Morebeer.com with a couple of items from Amazon.com. Everything, including the Blonde Ale ingredients, costs less than \$300 including shipping. The fermenter is high end plastic, probably the best you can buy. The only thing you will get charged for with shipping should be the 22oz bottles. MoreBeer won't ship those for free.

From MoreBeer.com

[7.9 Gallon Speidel HDPE Fermenter](#) (More expensive, but highest quality)
